It is with much pleasure that '1 commend Mr. E. T. Harrbut as a Piano Forte Tuner and regulator. To soy that he is an excellent tuner, would not be doing him justice, for I can without hesitation say that he is capable of tuning a Piano as near to perfection as it is passible for a Piano to be tuned; but the greatest recommendation for him is thumanial length of time which he Planos remain in tune. I have never, either in Europe or Amenica, seen a man when it would so cheerfully and with 50 much con Edence cumpley to tune or regulate a Piano Porte as Mr. Hurbbut, and as cheerfully recommend him to all who want Pianos tuned. Wissington, D. C., November 22, 1838. It is with much pleasure that I am prepared to say, that having witnessed the operation of making brick, by a new parented machine, by Sanda & Ounnings, it by far evceeds my expectations. It is very simple in its construction, and star in its operation. From my experience say a gradical machinist and model maker, having constructed several models for that purpose. I believe it to be far superior to anything I have ever seen. It can be worked with certainly and great facility, by the most ordinary labers, while it is mere that clay and modifs the brick at the same time. I would especially recommend it to all persons engaged in the brick business.
